### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 16 October 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ruiz (6,159,196) in view of R.A. Williams et al (Vol. 119 No. 11, November 1984).

Ruiz discloses a method for the treatment of venous stasis through vascular ablation, including the steps: advancing an elongated intraluminal member 16 through a vein to a treatment site (see fig. 1, col. 4, lines 22-42), activating the intraluminal member to disrupt or irritate surface of a vein wall of the vein at the treatment site in a manner creating spasm of the vein at the treatment site. The intended use of disrupting or irritating the surface of a vein wall must result in additional steps to be performed between the claim invention and the prior art in order to patentably distinguish the claimed invention from the prior art. Since the prior art is capable of performing the intended use, then it meets the claim; see MPEP 2106.

Ruiz is silent regarding the step of injecting sclerosant into the vein at the treatment site causing irreversible damage to endothelium at the treatment site by reducing the blood volume in the vein at the treatment site.

Williams et al teaches the step of injecting sclerosant into the vein at the treatment site.

Art Unit: 3734

3. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Ruiz by injecting sclerosant into the vein at the treatment site as taught by R.A. Williams in order to produce an irreversible endothelial damage in the area under the treatment and is a well know agent for used in revascularization (see R.A. Williams et al Vol. 119 No. 11, November 1984). As to claims 18-20, Ruiz discloses the intraluminal member comprises an infusion wire 12, and where the intraluminal member is a balloon catheter 32.

#### ***Response to Arguments***

4. Applicant's arguments filed 10/16/2007 have been considered but are moot in view of the new ground(s) of rejection. Applicant is asked to please refer to the modified prior art rejections above where examiner address applicant's concerns regarding prior art rejection.

#### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3734

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
